ESIM251/252 is a micro controller based device intended to inform about the alarm in automatic or security systems. It ensures alerts transmission via GSM network to your phone. If PGM or Bell output is activated, a warning call is dialled and a text message is sent to the preset phone numbers or to monitoring station. ESIM251/252 provides both dialler and controller functionalities in one device. The system supports remote control of lights, heating or other appliance by a phone call or SMS. ESIM251/252 comes with flexible user options to provide notifications up to 5 users.

FEATURES

• Built-in GSM/GPRS communicator
• Each input can be assigned to a separate user
• 3 ways of configuration: SMS, USB, Internet
• Up to 10 pre-recorded messages
• Microphone connector for covert listening
• Contact ID for monitoring stations
