

ISCOM2600G(-PWR) series switch

L2+ Gigabit Access Switch

The ISCOM2600G(-PWR) series switches, promoted by Raisecom, is the new-generation and cost-effective Layer 2 Gigabit Ethernet switches. It adopts a route switching software platform based on the Linux OS, and a high-performance hardware platform. With multiple interface types, such as ISCOM2608G-2GE, ISCOM2624G-4GE, ISCOM2624G-4C, ISCOM2648G-4GE, ISCOM2648G-4C, ISCOM2608G-2GE-PWR, and ISCOM2624G-4GE-PWR, it can provide flexible networking modes.

Featuring high reliability, high access security guarantee, easy administration, and simple management, it can meet carriers' requirements. In addition, it supports static route, ready IPv6, intelligent PoE, and so on. Therefore, it is widely adopted, such as campus network access.

ISCOM2600G(-PWR) Series

Highlights >>

High density

1U standard chassis, with a switching capacity of 176 Gbit/s.

Downlink interfaces: 8/24/48 10/100/1000 Base-T electrical interfaces.

Uplink interfaces: 2/4 1000 Mbit/s Combo interfaces or 4 10 Gbit/s SFP+ interfaces.

High reliability

Support STP, RSTP, and MSTP. RSTP and MSTP can implement millisecond-level protection switching and ensure network reliability. In addition, ISCOM2600G series support multi-process RSTP (MRSTP). The MSTP topology computation can be conducted independently in different process, which reduces the impact on the network caused by single device failure and facilitates capacity expansion and independent management on interfaces.

Support LACP and MLACP.

Support Ethernet Ring Protection Switching (ERPS), which complies with the ITU-T G.8032 standard. Provide a fault switching time less than 50ms.

Support loop detection to avoid access loops at the user side.

Support dual-system and dual-configuration-file redundancy backup.

Various security guarantees

Support IEEE802.1x-based interface authentication and MAC authentication, which implements the dynamic distribution of VLAN user policies.

Support various AAA modes, such as RADIUS and TACACS+.

Support port secure MAC and MAC address limit to prevent attacks from illegal users.

Support various ACL policies to control packet forwarding flexibly.

Support DHCPv4/v6 Snooping and Option 82/18/37 to avoid DHCP attacks.

Support DAI and IP Source Guard to prevent ARP flooding attacks and IP attacks.

Support broadcast storm to ensure the stability of the network.

Support lightning protection for the power supply and all Ethernet electrical interfaces, and reduce hardware investment for customers.

Individualized QoS

Support complex traffic classification. Support classifying traffic according to the customized fields in the packet.

Support rich scheduling policies, such as SP, WRR, SP+WRR, DRR, and SP+DRR.

Support a flow-based dual-rate three-color CAR and HCAR.

International Headquarters

change without notice

Support statistics based on traffic.

IPv6 Ready

Meet the requirement of IPv6 networking and support IPv6 remote management through Telnet or SNMP. Support IPv6 ACL, DHCPv6 Snooping, RA Snooping, and Option18/37 to ensure the network security. Support MLD Snooping to ensure the IPv6 multicast monitoring.

Smart PoE

Support powering the Powered Devices (PD) through the downlink interfaces, which complies with the IEEE802.3af/IEEE802.3at standard. Support controlling the PDs intelligently. First, it supports PD alive-check. Once the PD stops working and responding, the ISCOM2600G will resume the PoE interface power and bring the PD back to work. It will greatly enhance the network reliability by resetting the PD's power source through the PoE port, which reduces administrator management burden. Second, it supports automatically reboot the PD at a specific time each week. Therefore, it will reduce the chance of IP camera or AP crash resulted from buffer flow. Third, it supports supplying power during specified time intervals. On one hand, PD can stop working during non-business hours to increase life span for PD and security for SMBs. On the other hand, it is a powerful function to help SMBs save power. In addition, it also supports monitoring the power supply status, power, current, voltage, etc. and supports sending Trap messages, when PDs are unusual.

Advanced management system

Support SNMP, RMON, Telnet, SSH.

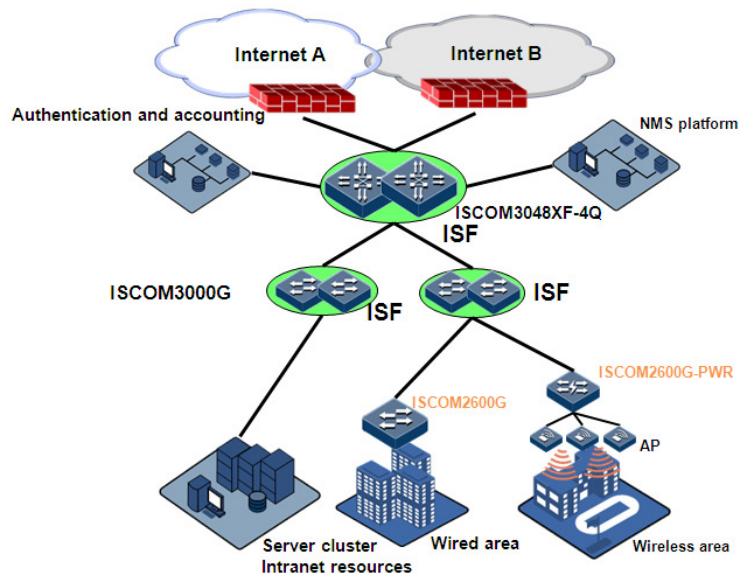

Support friendly WEB management to increase the usability of the device.*

Support automatic configuration and loading. The administrator can put the configuration file set in advance to the FTP/TFTP server for the automatic loading of the switch while it is booting, thus simplifying the management and maintenance.

Application >>

Campus networking

The ISCOM2600G series, ISCOM3000G(B) series, and ISCOM3000X series working together can provide a solution for large and medium-sized campus network. The ISCOM2600G(-PWR) serves as an access switch, providing 1000 Mbit/s data access. It also provides 10 GE interfaces, delivering high bandwidth for the access device. The Gigabit PoE devices can monitor PDs through the intelligent PoE feature.

MAN networking

The ISCOM2600G and ISCOM3000X together can provide a MAN access/aggregation solution. The ISCOM2600G serves as the access device, providing 48 GE interfaces in the downlink for high-density access and forming a 10 Gbit/s MAN access ring. Multiple access rings are connected to the downlink 10 Gbit/s interfaces on the ISCOM3000X switches. The ISCOM3000X switches form an 80 GE aggregation ring through the 40G*2 interfaces. In this cascaded ring network, the reliability of the access/aggregation devices is ensured. As a result, users are provided with high bandwidth and high reliability services.

Key Features >>

Device	ISCOM2608G-2GE(-P WR)	ISCOM264G-4GE(-P WR)	ISCOM2624G-4C	ISCOM2648G-4GE	ISCOM2648G-4C

Security

- AAA: user, DOT1X (based on port or MAC), RADIUS, TACAS+
- PPPOE+
- DAI and IPSG based on DHCP binding table
- Storm control: broadcast, multicast, DLF

Reliability

- LACP (max groups = port number/2,max member = down link number)
- STP/RSTP/MSTP(64 instance), MRSTP(Multi-process RSTP)
- Port backup
- Port protection
- Loop detection
- G.8032 v1/v2 (32 rings*, < 50ms)

IPv4

- Vlanif (16)
- Vlanif IPv4 address (1 master,1 slave)
- ARP IPV4 (1K), static ARP IPV4 (256)
- DHCP Server, DHCP Relay, DHCP Client, DHCP Snooping, DHCP Option(61, 82, 43)
- Proxy ARP

IPv6

- ARP IPV6 (512), static ARP IPV6 (128)
- NDP
- RA Snooping
- DHCPv6 Option (18,37)
- MLD Snooping/Proxy/Filter
- IPV6 management: Telnet(10 sessions), SSH(10 sessions), TFTP/FTP, SNTP/NTP, SNMP, and RADIUS

Route v4/v6

- IPv4 static/default routing (64)
- IPv6 static/default routing (32)

OAM

- IEEE802.3ah EFM
- IEEE802.1ag CFM*
- L2 loopback (swap MAC)
- IPv4/v6 Ping/Traceroute

Smart PoE

- downlink ports of IEEE802.3af/IEEE802.3at devices power
- per port PoE function enable/disable
- PD alive check
- automatically reboot PD
- PoE schedule for energy saving
- PoE usage monitoring

System

management

- Console CLI, SNMPv1/v2/v3, telnet (10 sessions), SSHv1/v2 (10 sessions), WEB*.
- RMON
- LLDP
- DDM
- Alarm management, syslog management
- Automatic configuration
- Mirror (based on port or flow, 2 groups)
