# Company Overview

## Company Introduction

Robustel is a cellular router & Gateway manufacturer specialising in 5G, 4G/LTE & LPWAN devices. Our products are used in smart cities, transportation, utilities, energy, Industrial IoT and many other applications to deliver robust and reliable connectivity.

## Data Highlights

**2 Million +**

Connected  
Terminals

**100 +**

Countries

**10,000 +**

Enterprise  
Customers

**10 +**

Global Offices

## Brand Philosophy

"Robustel" is composed of "Robust" and "Tel". "Robust" represents robustness in automation systems, which refers to the high reliability and robustness of the system, while "Tel" represents communication. Together, it means that Robustel provides highly reliable and robust communication products and systems in the industrial internet of things (IIoT). At a macro level, the people at Robustel are highly reliable and trustworthy, and the products and services they design must also be highly reliable.

## Why Choose Robustel?

Combination of  
Hardware & Software

High-reliability industrial grade cellular routers & gateways at a very competitive price point.

Free Device  
Platform

Free MS-Azure based device management platform with all products. Unique and powerful management features in advanced version.

Customization

In-house router OS development allows for fast customization and OEM branding.

Guaranteed  
Security

Excellent Cybersecurity practices including independent penetration testing on all software components.

Globalization

Supplying 100+ countries, with over 50 distribution partners to provide high quality localized service.

# Turnkey Manufacturing Facilities

Robustel's "Smart Factory" was developed from the ground-up in 2018 with full software and hardware design capabilities. Robustel developed MES systems based on "lean production" idea, which created an intelligent infrastructure for a data-driven, green and flexible supply-chain. Also, multiple SMT lines give Robustel complete control over production scheduling and QA of the manufactured products. These facilities are regularly used to deliver fully or semi-bespoke OEM products along with simple EMS capabilities.

## Robustel Industrial IoT Product

### Main Product

Industrial Wireless Communication Device

Edge Computing Gateway

Agriculture, Enterprise IT, Industrial IoT, Transport & Logistics, Smart Cities, Healthcare, Oil, Gas & Mining, Retail & Payments, Energy & Utilities, Environmental IoT

### Make Things Connected

## Typical Applications

### Energy & Utilities

Managing the reading, collection and distribution of traditional and renewable resources for consumer and business use.

### Smart Cities

Empowering councils and governments with connectivity for infrastructure, buildings, public spaces and traffic management.

### Transport & Logistics

In-Vehicle internet access for fleet management, logistics, public Wi-Fi, security and telematicdata.

### Retail & Payments

Wireless Monitoring and Communications for ATMs, Vending Machines, Kiosks, Digital Signage and Point of Sale systems.

### Enterprise IT

Primary internet access or fixed line failover connectivity for distributed office, retail or branch environments.

### Industrial IoT

Monitoring & managing assets, equipment and infrastructure in manufacturing, warehousing and construction.

### Oil, Gas & Mining

Employing remote control and management to improve safety and efficiency around the extraction of primary resources.

### Agriculture

Using sensing & wireless technology to improve irrigation, fertilization, yield and more in agriculture and farming.

### Environmental IoT

Environmental protection solutions for local conditions to realize intelligent environmental monitoring, disaster prevention and environmental compliance.

### Healthcare

Powering remote diagnostics, telemedicine solutions through wireless communications.

02

## Product Overview

# Software

## Operating System

## RobustOS

RobustOS is Robustel's proprietary router operating system. Built from the ground up around the Linux Kernel, RobustOS allows for lightweight firmware and application delivery across the Robustel product range.

RobustOS dovetails seamlessly with Robustel's free Microsoft Azure based router management platform - RCMS, allowing easy management of thousands or even millions of routers through a 'single pane of glass'.

### Security

RobustOS has been penetration tested by UK Cybersecurity experts Nettitude and shown to have ZERO VULNERABILITIES.

### Market Proven Reliability

More than 2 Million RobustOS devices have been deployed globally.

### App Centre

The 'App Centre' is an integral part of RobustOS, allowing bespoke applications to be quickly and reliably added into mainstream firmware branches.

### SDK

For additional flexibility and customization, you can create your own RobustOS Apps with the RobustOS SDK in C.

### Advanced Features

RobustOS has evolved to include many unique or advanced features that are useful for IoT and Enterprise applications alike.

# RobustOS Pro

RobustOS Pro is Robustel's powerful Debian based operating system with support for Docker based applications. RobustOS Pro is used in EG5000 series Gateways to provide communication and computing in a single box.

Customers can rapidly port, test and deploy new applications in whatever language they are comfortable developing in, in addition to giving customers access to over 50,000 existing applications in the Debian repository.

### User-friendly Web UI

RobustOS Pro features a colourful and easy to use Web UI providing a simple configuration interface for basic router functions. Power users can directly access the Debian CLI through SSH for low-level device control.

### Docker & Other Containerisation

RobustOS PRO leverages high performance ARM CPUs that can natively manage Docker & other containerization tools for quick and easy software redeployment.

### Security & Reliability

Secure boot (Optional)  
Signature verification for system updates  
Penetration tests by Nettitude (planned)

### Flash Manager

RobustOS Pro allows use of resource intensive 3rd party applications. Users can utilize "Flash Manager" to make sure the regularity of writes to the Flash memory (eMMC NAND Flash) will not cause excessive wear and early device failure.

# Software

## Device Management Platform

# ROBUSTEL CLOUD MANAGER SERVICE

Robustel Cloud Manager Service (RCMS) is an excellent Microsoft Azure based IoT cloud platform designed to work with RobustOS/RobustOS Pro based routers and gateways to help realise the true potential of Robustel products. It provides customers with comprehensive gateway monitoring, management and control features including a fully integrated VPN service.

	 <b>RCMS CLOUD</b>	 <b>RCMS BASIC</b> <small>Monitor your fleet of Robustel devices from anywhere in the world</small>	 <b>RCMS ESSENTIALS</b> <small>Manage and control your Robustel devices from any network or location</small>	 <b>RCMS ADVANCED</b> <small>Secure cloud based VPN access to your Robustel devices and end devices</small>	 <b>RCMS FREE TRIAL</b> <small>Any new Robustel device connecting to RCMS for the first time gets 3 months free</small>

## 24/7 Cloud SaaS Device Management - RCMS Cloud

robustel  
RCMS CLOUD

RCMS Cloud is a shared public cloud deployment of RCMS available to all Robustel customers.

### Environment

Hosted by Robustel in partnership with Microsoft Azure for enhanced scalability and security options.

### Available Apps

### Price Model

OPEX with tiered pricing per device based on features required.

### Customization

- Custom APPs & Features available from APP Centre
- Custom APP development available with restrictions

### Advantage

- Free Read-Only basic access for all customers
- No need for hosting or third-party integration costs
- Standardized Code Base updated regularly for security, bugs and new features.
- Microsoft Azure Active Directory and IoT Hub Integration.
- Connected to the Robustel App Centre to send the latest firmware and RobustOS APPs directly to devices.

## Locally Hosted Device Management - RCMS Stack

**robustel**  
**RCMS STACK**

RCMS STACK is a private version of the RCMS platform packaged and installed in a customer's environment.

### Environment

Hosted by the customer in their environment of choice; Either a local server, physical data centre or cloud provider.

### Available Apps

### Price Model

CAPEX Set-up + Annual OPEX fee (Customer owned Infrastructure Cost)

### Customization

- Custom APPs & Features available on request
- OEM Software Development options available at cost

### Advantage

- Custom URL & Destination Server
- Standardized Code Base updated regularly for security, bugs and new features.
- Data stored locally
- Ports can be restricted for 'Local operation'
- Becomes more cost effective at high device volumes as long as infrastructure is maintained.

# Empower Your Devices with Cloud Management

## Monitor

The RobustLink App inside RCMS gives you visibility of your entire Robustel device fleet in a single location from anywhere in the world. View device status, signal strength, data usage and WAN details for any device connected to the platform at the touch of a button.

### Management Dashboard

Total Devices Online/Offline | Devices by Connection Type | Total Devices by Group | Total Devices by Model | Total Devices by Cellular Carrier.

### Individual Device Statistics

Online/Offline Status | Connection Type & Link Details | Signal Strength | Data Usage | Location (GPS, Cellular or Manual) | Installed Apps & Firmware.

### Remote Syslog

Enable/Disable Syslog features remotely and export them for analysis.

## Manage

Use the RobustLink App inside RCMS to access your devices remotely to change configuration parameters or send device commands through remote Command Line Interface (CLI) access. Maintain your fleet through Over-the-Air (OTA) updates for Firmware, Apps and Configuration files in bulk or for a single device.

### Over-the-Air (OTA) Updates

Update Firmware, RobustOS Apps and XML config files.

### Remote Command Line Interface (CLI)

Configure any device connected to RCMS using the CLI without the need for a fixed/addressable IP Address.

### Remote Reboot

Remote actions allow you to automatically reboot a batch of devices or a single unit with the press of a button.

## Control

Use the RobustVPN App inside RCMS to create a virtual LAN for your devices that can be accessed securely from anywhere in the world using the preconfigured desktop VPN client.

### Access groups of devices through a single VPN

Configure VPN groups within RCMS to control the devices and users that are allowed to access your virtual network.

### Controlled VPN Usage

Use RCMS to control when your virtual network is available. Configure your VPN to be always available or only when needed to reduce network traffic.

### VPN Traffic Logging

VPN Traffic logs allow you to pinpoint problem devices quickly and efficiently.

# Hardware

## Industrial Edge Computing Gateway

Robustel's Edge Computing Gateways combines all the benefits of Robustel's tried and tested RobustOS operating system with a Debian embedded computer to create the ultimate hybrid product Comms & Compute all in one box.

The Dual OS design uses RobustOS Pro to make router management easy whilst allowing the User to access the underlying Debian OS from the command line to install new or existing 3rd party applications on the same hardware.

Robustel's Edge Computing Gateways equipped CPU(s) use the same instruction as the ubiquitous Raspberry Pi computer powered by ARM architecture meaning all existing applications can be easily ported to Edge Computing Gateways, optionally using Docker containerization.

# Robustel EG5120

## 5G Industrial Edge Computing Gateway

Robustel's EG5120 is a new generation of industrial edge computing gateway, supporting global 5G/4G/3G/2G networks for cellular backhaul, with a fully-fledged Debian 11 (bullseye) based operating system able to support thousands of existing or new ARMv8 (Raspberry Pi compatible) based applications.

robust OS Pro

### High Speed Connection

Robustel's 5G routers support 5G Release 16 with fast DL/UL speeds in NSA/SA modes. 4G+ Carrier Aggregation ensures fast connections without 5G.

### Powerful Hardware Performance

The iMX.8M.Plus high-performance hardware platform provides a strong foundation for information processing and complex task handling.

### AI Computing Capability

Equipped with an NPU with a computing power of 2.3 TOPs, it can support high-speed image recognition and video data processing.

### Supports Docker

Robustel's Docker containerisation allows easy porting of software to EG5000 series Gateways from other platforms.

# Robustel EG5100

## Industrial Edge Computing Gateway

Robustel's EG5100 is a new generation of industrial edge computing gateway, supporting global 4G/3G/2G networks for cellular backhaul, with a fully-fledged Debian 11 (bullseye) based operating system able to support thousands of existing or new ARMv7 (Raspberry Pi compatible) based applications.

robust **OS** Pro

### Cost-effective Hardware

Robustel hardware: Industrial grade, durable, wide voltage/temperature range, cost-effective for high volume Industrial/IoT rollouts.

### Extensive International Certifications

Robustel heavily invests in global certifications for Robustel's Global IoT Router, making it one of the most certified worldwide.

### Dual SIM Card Design

Dual SIM backup enhances network resilience - 2 networks are better than 1!

### Serial Ports & Digital IO Onboard

Equipped with multiple Ethernet ports. Built-in network switch to meet the needs of multi-device access.

# Hardware

## 5G Industrial Router

Industries are rapidly introducing a suite of IoT technologies to improve the productivity and cost-efficiency of their operations. Sensors, robotics and automated systems are all common in networks across various industries, from medical to manufacturing.

5G wireless router technology enables this expeditious deployment of high-speed IoT applications and enables industries to increase their network bandwidth, while reducing latency and costs.

Robustel's 5G industrial routers brings the next generation of cellular connectivity to your industry, enabling rapid response times, and maintains reliable and stable communications in harsh industrial environments.

# Robustel R5020

## High Speed Smart 5G Router

The R5020 is Robustel's first 5G capable router supporting global 5G, 4G and 3G bands. The R5020 leverages the tried and tested high performance CPU platform, RobustOS - a mature and stable Operating System developed in-house by Robustel.

### High Speed Connection

Robustel's 5G routers support 5G Release 16 with fast DL/UL speeds in NSA/SA modes. 4G+ Carrier Aggregation ensures fast connections without 5G.

### Multiple Ethernet Ports

Equipped with multiple Ethernet ports. Built-in network switch to meet the needs of multi-device access.

### Vehicle Certification

Achieved E-mark certification for use in private and commercial vehicles

### Serial Ports & Digital IO Onboard

Support for legacy serial devices with RS232/RS485 interfaces provides maximum flexibility when used as a Modbus RTU interface, with IO for status indication and control.

# Robustel R5020 Lite

## High Speed Smart 5G Router

The R5020 Lite is Robustel's new 5G capable router supporting global 5G, 4G and 3G bands. The R5020 Lite leverages our tried and tested high performance CPU platform, RobustOS - an Operating System developed in-house by Robustel that has passed extensive 3rd party penetration testing.

### High Speed Connection

Robustel's 5G routers support 5G Release 16 with fast DL/UL speeds in NSA/SA modes. 4G+ Carrier Aggregation ensures fast connections without 5G.

### Cost-effective Hardware

Robustel hardware: Industrial grade, durable, wide voltage/temperature range, cost-effective for high volume Industrial/IoT rollouts.

### Flexible 802.11 Wi-Fi Services

Robustel routers offer Wi-Fi client, AP and dual modes, with advanced onboard firewall.

### Serial Ports Onboard

RS232/485 support for Modbus RTU interface, connecting thousands of sensors/instruments for maximum flexibility.

# Hardware

## Global Industrial Router

Traditionally, 4G routers have had to be supplied on a 'per region' basis due to cost and certification issues but the R1520 Global changes all that with global 4G (LTE) frequencies and a massive investment by Robustel in Global certifications.

# Robustel R1520 Global

## Global Industrial Dual SIM Cellular VPN Router

The R1520 Global router is Robustel's latest addition to the popular R1520 series. The Global variant has been designed for companies that want a simple one size fits all for global 4G deployments.

### Cost-effective Hardware

Robustel hardware: Industrial grade, durable, wide voltage/temperature range, cost-effective for high volume Industrial/IoT rollouts.

### Vehicle Certification

Achieved E-mark certification for use in private and commercial vehicles

### Extensive International Certifications

Robustel heavily invests in global certifications for R1520G 4G router, making it one of the most certified worldwide.

### High Precision Positioning

Provides precise location via GNSS and accurate navigation.

# Hardware

## Industrial Cellular Router

Connectivity defines almost every aspect of our lives, and industry is no exception. From agriculture to M2M communications and factory automation, industrial connectivity is bringing new levels of innovation to a range of environments.

Cellular communications is one of the most popular connectivity choices for IIoT solutions. These networks are designed to handle high volumes of data and are commonly deployed around the globe. A cellular router will provide secure and reliable connectivity in harsh, demanding environments over a cellular network.

# Robustel R2110

## High Speed Smart LTE Router

The Robustel High Speed Smart LTE Router (R2110) is a rugged cellular router offering state-of-the-art mobile connectivity for internet of things applications.

### Robust Industrial Design

Robustel's quality products have industrial housing for reliability in any conditions, and protect against humidity, dust, vibration and EMC.

### Dual SIM Card Design

Dual SIM backup enhances network resilience - 2 networks are better than 1!

### Multiple Gigabit Ethernet Ports

Equipped with 4x1000M Ethernet ports. Built-in network switch to meet the needs of multi-device access.

### Serial Ports & Digital IO Onboard

Support for legacy serial devices with RS232/RS485 interfaces provides maximum flexibility when used as a Modbus RTU interface, with IO for status indication and control.

# Robustel R3000 Quad

## Industrial Cellular VPN Router with 4 Ethernet Ports

The Robustel Industrial Dual SIM Cellular VPN Router (R3000 Quad) is a rugged cellular router offering state-of-the-art mobile connectivity for machine to machine (M2M) applications.

### Robust Industrial Design

Robustel's quality products have industrial housing for reliability in any conditions, and protect against humidity, dust, vibration and EMC.

### Multiple Ethernet Ports

Equipped with multiple Ethernet ports. Built-in network switch to meet the needs of multi-device access.

### Dual SIM Card Design

Dual SIM backup enhances network resilience - 2 networks are better than 1!

### Serial Ports Onboard

RS232/485 support for Modbus RTU interface, connecting thousands of sensors/instruments for maximum flexibility.

# Robustel R3000 Lite

## Industrial Dual SIM Cellular VPN Router

The Robustel Industrial Dual SIM Cellular VPN Router (R3000 Lite) is a rugged cellular router offering state-of-the-art mobile connectivity for machine to machine (M2M) applications.

### Compact Design

Small in size and rich in functions, it can meet the installation requirements in narrow spaces.

### Cellular Connection Keepalive

Robustel's cellular keepalive monitors and recovers from connectivity loss between routers and mobile networks.

### Serial Ports Onboard

RS232/485 support for Modbus RTU interface, connecting thousands of sensors/instruments for maximum flexibility.

### Free Router Management Platform

RCMS router management platform manages SIMs and routers at scale. Free basic version, advanced features on PAYG - compelling commercially.

## Hardware

<b>Cellular</b>	4G/LTE, 3G WCDMA, 2G GSM
<b>Housing&amp;Weight</b>	Metal, 305 g
<b>Dimension</b>	105 x 98 x 29.5 mm
<b>Operating Temperature</b>	-40 to +75 °C
<b>Power Supply</b>	9 ~ 36 V
<b>Antenna Interface</b>	2 x Cellular Antenna
<b>Ethernet Port</b>	1 x 10/100 Mbps
<b>Serial Port</b>	1 x RS232 + 1 x RS485

# Robustel R2010

## Dual-SIM VPN IoT Router

The Robustel R2010 Industrial Cellular Gateway is a rugged, versatile 4G Gateway with dual Ethernet ports, dual SIM single standby capability and a range of advanced functions for mission critical IoT or M2M applications.

### Cost-effective Hardware

Robustel hardware: Industrial grade, durable, wide voltage/-temperature range, cost-effective for high volume Industrial/IoT rollouts.

### Robust Industrial Design

Robustel's quality products have industrial housing for reliability in any conditions, and protect against humidity, dust, vibration and EMC.

### Dual SIM Card Design

Dual SIM backup enhances network resilience - 2 networks are better than 1!

### Serial Ports & Digital IO Onboard

Support for legacy serial devices with RS232/RS485 interfaces provides maximum flexibility when used as a Modbus RTU interface, with IO for status indication and control.

## Hardware

<b>Cellular</b>	4G/LTE, 3G WCDMA, 2G GSM	<b>DI/DO</b>	1 x DI, 1 x DO
<b>Housing &amp; Weight</b>	Metal, 350 g	<b>SIM Card Slot</b>	2
<b>Dimension</b>	127 x 82 x 30 mm		
<b>Operating</b>	-35 to +75 °C		
<b>Power Supply</b>	9 ~ 36 V		
<b>PoE-PD</b>	Optional		
<b>Antenna Interface</b>	2 x Cellular Antenna, 2 x Wi-Fi Antenna		
<b>Wi-Fi</b>	2.4 GHz, up to 300Mbps		
<b>Ethernet Port</b>	2 x 10/100 Mbps, can be configured 2 LAN or 1 WAN + 1 LAN		
<b>Serial Port</b>	1 x RS232/RS485, software configurable

# Robustel R2011

## Versatile IoT Router with 5 Ethernet Ports

The Robustel R2011 Industrial Cellular Router is a rugged, versatile 4G router with 5 Ethernet ports, dual SIM single standby capability and a range of advanced functions for mission critical IoT or M2M applications.

### Cost-effective Hardware

Robustel hardware: Industrial grade, durable, wide voltage/temperature range, cost-effective for high volume Industrial/IoT rollouts.

### Dual SIM Card Design

Dual SIM backup enhances network resilience-2 networks are better than 1!

### Multiple Ethernet Ports

Equipped with multiple Ethernet ports. Built-in network switch to meet the needs of multi-device access.

### Flexible 802.11 Wi-Fi Services

Robustel routers offer Wi-Fi client, AP and dual modes, with advanced onboard firewall.

## Hardware

<b>Cellular</b>	4G/LTE, 3G WCDMA, 2G GSM
<b>Housing&amp;Weight</b>	Metal, 350 g
<b>Dimension</b>	127 x 82 x 30 mm
<b>Operating Temperature</b>	-35 to +75 °C
<b>Power Supply</b>	9 ~ 36 V
<b>PoE-PD</b>	Optional
<b>Antenna Interface</b>	2 x Cellular Antenna, 2 x Wi-Fi Antenna
<b>Wi-Fi</b>	2.4 GHz, up to 300Mbps
<b>Ethernet Port</b>	5 x 10/100 Mbps, can be configured 5 LAN or 1 WAN + 4 LAN
<b>SIM Card Slot</b>	2

# Robustel R1520

## Industrial Dual SIM Cellular VPN Router

The R1520 router from Robustel is a versatile 4G router with 5 Ethernet ports and a range of advanced functions for IoT Applications.

### Cost-effective Hardware

Robustel hardware: Industrial grade, durable, wide voltage/temperature range, cost-effective for high volume Industrial/IoT rollouts.

### Multiple Ethernet Ports

Equipped with 5 Ethernet ports. Built-in network switch to meet the needs of multi-device access.

### Serial Ports & Digital IO & Analog Input Onboard

Support for legacy serial devices with RS232/RS485 interfaces provides maximum flexibility when used as a Modbus RTU interface, with IO and analog inputs.

### Vehicle Certification

Achieved E-mark certification for use in private and commercial vehicles.

## Hardware

<b>Cellular</b>	4G/LTE, 3G WCDMA, 2G GSM	<b>AI</b>	1 x Analog Input, (can be configured as voltage or current mode)
<b>Housing &amp; Weight</b>	Plastic, 250g	<b>SIM Card Slot</b>	2
<b>Dimension</b>	105 x 90 x 46 mm		
<b>Operating Temperature</b>	-25 to +70 °C		
<b>Power Supply</b>	9 ~ 36 V		
<b>Antenna Interface</b>	2 x Cellular Antenna, 2 x Wi-Fi Antenna		
<b>Wi-Fi</b>	2.4 GHz, up to 300Mbps		
<b>Ethernet Port</b>	5 x 10/100 Mbps, can be configured 5 LAN or 1 WAN + 4 LAN		
<b>Serial Port</b>	1 x RS232 + 1 x RS485		
<b>DI/DO</b>	1 x DI + 1 x DO, wet contact

# Robustel R1511

## Industrial Cellular VPN Router

Robustel's R1511 router is a Dual Ethernet port (LAN + WAN) 2G/3G/4G/LTE router with advanced software functions at a very competitive price point.

### Cost-effective Hardware

Robustel hardware: Industrial grade, durable, wide voltage/temperature range, cost-effective for high volume Industrial/IoT rollouts.

### Flexible 802.11 Wi-Fi Services

Robustel routers offer Wi-Fi client, AP and dual modes, with advanced onboard firewall.

### Serial Ports Onboard

RS232/485 support for Modbus RTU interface, connecting thousands of sensors/instruments for maximum flexibility.

### Free Router Management Platform

RCMS router management platform manages SIMs and routers at scale. Free basic version, advanced features on PAYG - compelling commercially.

## Hardware

<b>Cellular</b>	4G/LTE, 3G WCDMA, 2G GSM
<b>Housing &amp;Weight</b>	PLastic, 150g
<b>Dimension</b>	91.5 x 91.5 x 31.5 mm
<b>Operating Temperature</b>	-25 to +70 °C
<b>Power Supply</b>	9 ~ 36 V
<b>Antenna Interface</b>	2 x Cellular Antenna, 1 x Wi-Fi Antenna
<b>Wi-Fi</b>	2.4 GHz, up to 300Mbps
<b>Ethernet Port</b>	2 x 10/100 Mbps, can be configured 2 LAN or 1 WAN + 1 LAN
<b>Serial Port</b>	1 x RS232 or 1 x RS485, hardware optional
<b>SIM Card Slot</b>	1

# Robustel R1510

## Industrial Cellular VPN Router

Robustel's R1510 router is a Dual Ethernet port (LAN + WAN) 3G/4G router with advanced software functions at a very competitive price point.

### Cost-effective Hardware

Robustel hardware: Industrial grade, durable, wide voltage/temperature range, cost-effective for high volume Industrial/IoT rollouts.

### Flexible 802.11 Wi-Fi Services

Robustel routers offer Wi-Fi client, AP and dual modes, with advanced onboard firewall.

### Digital IO Onboard

Robustel routers: DI - status indication, DO - control/reboot external devices

### Free Router Management Platform

RCMS router management platform manages SIMs and routers at scale. Free basic version, advanced features on PAYG - compelling commercially.

## Hardware

<b>Cellular</b>	4G/LTE, 3G WCDMA, 2G GSM
<b>Housing &amp;Weight</b>	PLastic, 150g
<b>Dimension</b>	91.5 x 91.5 x 31.5 mm
<b>Operating Temperature</b>	-25 to +70 °C
<b>Power Supply</b>	9 ~ 36 V
<b>Antenna Interface</b>	2 x Cellular Antenna, 1 x Wi-Fi Antenna
<b>Wi-Fi</b>	2.4 GHz, up to 300Mbps
<b>Ethernet Port</b>	2 x 10/100 Mbps, can be configured 2 LAN or 1 WAN + 1 LAN
<b>DI/DO</b>	1 x DI + 1 x DO, wet contact

# Hardware

## LoRaWAN Gateway

There is growing momentum around LoRaWAN solutions for the connectivity of Internet of Things (IoT) networks. LoRaWAN solutions are ideal for supporting wireless connectivity and are already being deployed across several industries.

Robustel LoRaWAN gateways are able to deliver high-performance with a customised design to suit your IoT needs.

# Robustel R3000 LG

## Industrial LoRaWAN Gateway

Robustel R3000 LG is an industrial-grade LoRaWAN gateway, integrated with LoRaWAN wireless communication technology and cellular network technology, to provide users with wireless long-distance data transmission services.

robust  
OS5

### Robust Industrial Design

Robustel's quality products have industrial housing for reliability in any conditions, and protect against humidity, dust, vibration and EMC.

### Support LoRaWAN Globally

Support LoRaWAN frequency bands worldwide, ensuring seamless connectivity regardless of location.

### Built-in Web Server

Feature a built-in web server, eliminating the need for costly cloud server operations.

### Serial Ports & Digital IO Onboard

Support for legacy serial devices with RS232/RS485 interfaces provides maximum flexibility when used as a Modbus RTU interface, with IO for status indication and control.

## Hardware

<b>Cellular</b>	4G/LTE, 3G WCDMA, 2G GSM	<b>USB</b>	1 x USB 2.0 (host)
<b>Housing &amp; Weight</b>	Metal, 570 g	<b>MicroSD</b>	Support
<b>Dimension</b>	125 x 104 x 43.5 mm		
<b>Operating Temperature</b>	-40 to +75 °C		
<b>Power Supply</b>	9 ~ 60 V		
<b>Antenna Interface</b>	2 x Cellular Antenna, 1 x LoRa Antenna, 1 x GPS Antenna (Optional)		
<b>GNSS (incl. GPS)</b>	Optional		
<b>Ethernet Port</b>	2 x 10/100 Mbps, can be configured 2 LAN or 1 WAN + 1 LAN

# Robustel LG5100

## Industrial Edge Computing LoRaWAN Gateway

Robustel's LG5100 series is a new generation of industrial LoRaWAN gateway, supporting global 4G/3G/2G networks for cellular backhaul, with a fully-fledged Debian Operating System able to support thousands of existing or new ARMv7 (Raspberry Pi compatible) based applications.

robust **OS** Pro

### Support LoRaWAN Globally

Support LoRaWAN frequency bands worldwide, ensuring seamless connectivity regardless of location.

### Built-in Web Server

Feature a built-in web server, eliminating the need for costly cloud server operations.

### Supports Docker

Robustel's Docker containerisation allows easy porting of software to EG5000 series Gateways from other platforms.

### Serial Ports & Digital IO Onboard

Support for legacy serial devices with RS232/RS485 interfaces provides maximum flexibility when used as a Modbus RTU interface, with IO for status indication and control.

## Hardware

<b>Cellular</b>	4G/LTE, 3G WCDMA, 2G GSM	<b>Ethernet Port</b>	2 x RJ45, 10/100Mbps
<b>CPU</b>	ARM Cortex-A7, 792MHz	<b>Serial Port</b>	2 x RS232/RS485, software configurable
<b>Memory</b>	512MB DDR3	<b>DI/DO</b>	2 x DI, 2 x DO, wet contact
<b>Flash</b>	8 GB eMMC	<b>USB</b>	1 x USB 2.0 (host), Type A, 5V 500mA
<b>Housing &amp; Weight</b>	Metal, 555g	<b>SIM Card Slot</b>	2
<b>Dimension</b>	49 x 105 x 128 mm		
<b>Operating Temperature</b>	-40 to +70 °C		
<b>Power Supply</b>	9 ~ 60V

# Hardware

## IP67 Outdoor Router

As industries grow into remote environments, there's a demand for secure and reliable network solutions for outdoor areas that can withstand harsh weather conditions. From providing high-speed internet access to events and campuses to public facilities and oil and gas, an outdoor WiFi router allows you to connect to the internet whenever and wherever you need it. Robustel has an outdoor router for your needs. Support a temporary event, connect stations or maintain a reliable connection in the toughest environments.

# Robustel R1520G-OG

## IP67 Rated Outdoor Router

The R1520G-OG is an IP67 rated outdoor router (including TPH-R1520 and R1520-4L Global) that is ideal for adding Wi-Fi internet access at events, on campuses or when a rugged housing is required for indoor deployments.

### Ingress Protection Level IP67

Robustel outdoor gateway offers IP67-rated protection against dust and water, making it resistant to water splashes, dust, and other harsh weather conditions.

### Serial Ports & Digital IO & Analog Input Onboard

Support for legacy serial devices with RS232/RS485 interfaces provides maximum flexibility when used as a Modbus RTU interface, with IO and analog inputs.

### Multiple Ethernet Ports

Equipped with multiple Ethernet ports. Built-in network switch to meet the needs of multi-device access.

### Extensive International Certifications

Robustel heavily invests in global certifications for R1520G 4G router, making it one of the most certified worldwide.

## Hardware

<b>Cellular</b>	4G/LTE, 3G WCDMA, 2G GSM	<b>AI</b>	1 x Analog Input, (can be configured as voltage or current mode)
<b>Housing &amp; Weight</b>	Plastic, 2008g including R1520, excludes antennas and mounting hardware	<b>SIM Card Slot</b>	2
<b>Dimension</b>	105 x 90 x 46 mm		
<b>Operating Temperature</b>	-25 to +70 °C

# Hardware

## Embedded 3G/4G Router

Embedded 4G and 3G routers solve two problems that often plague traditional routers: cost and size, using boards that are tighter in footprint, yet massive in their capabilities.

Robustel's R1511P embedded router is smaller than a traditional router and easily used for space-constrained applications and devices. This router provides high-speed wireless network bandwidth for devices through a wireless connection, ensuring a stable connection to the network.

# Robustel R1511P

## Embedded LTE Router

The R1511P Embedded 4G/LTE Router is a cost-effective small footprint board. It offers Ethernet WAN, Wi-Fi WAN and 4G WAN interfaces. These can all be independently configured in our powerful onboard Operating System - RobustOS.

### Designed for Embedded Applications

An ideal solution for embedded applications to customers who need to purchase in large quantities while minimizing procurement costs.

### Dual SIM Card Design

Dual SIM backup enhances network resilience - 2 networks are better than 1!

### Serial Ports Onboard

RS232/485 support for Modbus RTU interface, connecting thousands of sensors/instruments for maximum flexibility.

### Connect Directly to IoT Platforms

Seamlessly link with IoT cloud platforms like MS Azure IoT Hub, AWS, Alibaba, Tencent, DeviceWISE & MQTT-based platforms.

## Hardware

<b>Cellular</b>	4G/LTE, 3G WCDMA, 2G GSM
<b>Weight</b>	65g
<b>Operating Temperature</b>	-25 to +70 °C
<b>Power Supply</b>	9 ~ 36 V
<b>Antenna Interface</b>	2 x Cellular Antenna, 1 x Wi-Fi Antenna
<b>Wi-Fi</b>	2.4 GHz, up to 300Mbps
<b>Ethernet Port</b>	2 x 10/100 Mbps, can be configured, 2 LAN or 1 WAN + 1 LAN
<b>Serial Port</b>	1 x RS232 or 1 x RS485, hardware optional
<b>SIM Card Slot</b>	1

# Robustel R1511P-DevKit

## Embedded 4G Router Development Kit

The R1511P Development Kit provides prospective customers with all the parts required to evaluate the suitability of the R1511P embedded 4G router for integration into custom products / projects.

### Support for Custom Applications

RobustOS and RobustOS PRO have SDKs for running supplementary software on router resources, saving the cost of an embedded PC.

### Serial Ports Onboard

RS232/485 support for Modbus RTU interface, connecting thousands of sensors/instruments for maximum flexibility.

### Unique Edge2Cloud (E2C) Software

Support for powerful Edge2Cloud IoT Gateway via innovative software, used in many Modbus to Cloud projects.

### Connect Directly to IoT Platforms

Seamlessly link with IoT cloud platforms like MS Azure IoT Hub, AWS, Alibaba, Tencent, Device-WISE & MQTT-based platforms.

## Hardware

<b>Cellular</b>	4G/LTE, 3G WCDMA, 2G GSM
<b>Weight</b>	65g
<b>Operating Temperature</b>	-25 to +70 °C
<b>PowerSupply</b>	9 ~ 36 V
<b>Antenna Interface</b>	2 x Cellular Antenna, 1 x Wi-Fi Antenna
<b>Wi-Fi</b>	2.4 GHz, up to 300Mbps
<b>Ethernet Port</b>	2 x 10/100 Mbps, can be configured, 2 LAN or 1 WAN + 1 LAN
<b>Serial Port</b>	1 x RS232 or 1 x RS485, hardware optional
<b>SIM Card Slot</b>	1

# Hardware

## Smart Industrial IoT Gateway

Industrial automation depends on stable network connectivity and data transmission .

Robustel Wireless Data Terminal can be applied to across many verticals, such as Energy, Transportation and Agriculture, to name a few.

# Robustel M1200

## Smart Industrial IoT Gateway

The Robustel M1200 Industrial LTE Gateway is a rugged industrial IoT modem, designed for connecting devices globally. It is based on GSM/GPRS/EDGE/UMTS/WCDMA/HSDPA/HSUPA/HSPA+/FDD LTE/TDD LTE networks.

robust  
OS5

### Compact Design

Small in size and rich in functions, it can meet the installation requirements in narrow spaces.

### Cellular Connection Keepalive

Robustel's cellular keepalive monitors and recovers from connectivity loss between routers and mobile networks.

### Connect Directly to IoT Platforms

Seamlessly link with IoT cloud platforms like MS Azure IoT Hub, AWS, Alibaba, Tencent, Device-WISE & MQTT-based platforms.

### Free Router Management Platform

RCMS router management platform manages SIMs and routers at scale. Free basic version, advanced features on PAYG - compelling commercially.

## Hardware

<b>Cellular</b>	4G/LTE, 3G WCDMA, 2G GSM
